**Subject:** Hoosick Falls Update

I just got off the phone with Justin Deming (NYSDOH) who contacted me to give me and update on the subject matter. Below is a summary of the call.

- Saint Gobain submitted the GAC design to Hoosick Falls yesterday.
- Saint Gobain still does not have a written agreement with Hoosick Falls, they only have a purchase order so far.
- Saint Gobain agreed to install seven POETS at food service establishments (restaurants and the like).
- In addition to providing 1 gallon and 2.5 gallon water containers that can be picked up from Tops Store in Hoosick falls, they are also installing water coolers at senior residence establishments and the like (on-site water service).
- Saint Gobain already performed pilot test on a the GAC. Their objective is to install enough carbon beds in the GAC system to reduce PFCs to non-detect.
